

DAVID PLUMMER & ASSOCIATES

TRAFFIC ENGINEERING • CIVIL ENGINEERING • TRANSPORTATION PLANNING

1750 PONCE DE LEON BOULEVARD | CORAL GABLES, FLORIDA 33134
305•447•0900 | DPA@DPLUMMER.COM

David Plummer & Associates (DPA), with corporate offices in Coral Gables, FL, was incorporated in 1978 for the specific purpose of providing transportation-oriented services to public and private sector clients throughout South Florida. Initially, our professional services emphasized transportation planning and traffic engineering design. Since the early 1980s, **DPA** has offered complete civil engineering services, including transportation planning, traffic engineering, major highway/roadway design, minor structural engineering, signalization design, site civil engineering, as well as post-design services.

DPA's transportation planning and traffic engineering efforts include macro and micro simulation modeling, traffic impact studies, and safety studies for many large-scale and small-scale projects in South Florida, including commercial, residential, medical, as well as public facilities. Some of our clients/projects include Babcock Ranch, Gulf Coast Town Center, Lennar, Lee County, City of Fort Myers, Baptist Health Systems, Related Group, and Trammell Crow Residential.

DPA is currently seeking a transportation planner / traffic engineer candidate for a role in our Fort Myers office. Interested candidates should send their resume to dpa@dplummer.com. The qualifications and responsibilities for this position are below:

David Plummer & Associates (DPA) is seeking a Transportation Engineer / Transportation Planner in our Fort Myers, Florida office. A bachelor's degree in engineering, urban planning, or related field is required. Experience is desirable, but not required.

Candidate should be a hard-working, dedicated self-starter. Position involves progressively responsible assignments leading to project management, which includes data collection, spreadsheets and data manipulation, GIS, roadway and intersection capacity analyses, preparation of traffic impact statements, formulation of corridor and areawide transportation studies, traffic delay and queue studies, research, and power point presentations.

Since 1978
