**David Plummer & Associates (DPA)**, with corporate offices in Coral Gables, FL, was incorporated in 1978 for the specific purpose of providing transportation-oriented services to public and private sector clients throughout South Florida. Initially, our professional services emphasized transportation planning and traffic engineering design. Since the early 1980s, **DPA** has offered complete civil engineering services, including transportation planning, traffic engineering, major highway/roadway design, signalization design, site civil engineering, as well as post-design services.

**DPA's** transportation planning and traffic engineering efforts include macro and micro simulation modeling, traffic impact studies, and safety studies for many large-scale and small-scale projects in South Florida, including commercial, residential, medical, as well as public facilities. Some of our clients/projects include Miami Freedom Park Soccer Village, Lennar, SHOV, City of Coral Gables, Baptist Health Systems, Related Group, Kendall Town Center, and Sole Mia.

**DPA** is currently seeking a transportation engineering intern candidate for a role in our Coral Gables office. The intern will participate as a valuable member of the engineering team at DPA by working directly with the engineering staff to collect traffic data, input traffic information of spreadsheets, run traffic modeling software and do a variety of tasks related to traffic engineering and transportation planning. The candidate should be enrolled in, or a graduate of an engineering, urban planning, or related degree program.

Interested candidates should send their resume to [dpa@dplummer.com](mailto:dpa@dplummer.com). The responsibilities for this position are as follows:

- Participate as a multidisciplinary engineering team member
- Perform basic engineering calculations
- Organize information for use in drawings or other documents
- Assist other engineers in various tasks and duties
- Participate in field reviews and data collection
- Participate in the QA/QC process

Candidate should be a hard-working, dedicated self-starter. Position involves progressively responsible assignments which includes data collection, spreadsheets and data manipulation, roadway and intersection capacity analyses, preparation of traffic impact statements, formulation of corridor and areawide transportation studies, traffic delay and queue studies, and research.
